Summary

Result-driven Frontend Developer with 2+ years of experience designing and deploying responsive web applications using React, Next.js, and TypeScript. Proven ability to improve UI performance, scalability, and user engagement through clean, maintainable code. Adept at collaborating across teams, optimizing workflows, and delivering pixel-perfect, high-performing interfaces aligned with business goals.

Core Competencies

Frontend Development | React | Next.js | TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | Tailwind CSS | Framer Motion | RESTful APIs | Responsive Design | Git & GitHub | Agile & Scrum | UI/UX Optimization | Performance Tuning | Cross-Browser Compatibility | Accessibility (A11y) | Vercel Deployment

Experience

Frontend Developer | Freelance Projects
Remote | 2023 – Present

- Developed and deployed 3+ full-stack web applications using React, Next.js, and TypeScript, improving user experience and scalability across multiple projects.
- Built 20+ reusable UI components with modular architecture, reducing development time by 30% and improving code consistency.
- Optimized application performance by implementing lazy loading, image compression, and code splitting — resulting in Lighthouse scores of 90+ for performance and accessibility.
- Integrated RESTful APIs for data visualization and real-time functionality, improving application responsiveness and reliability.
- Collaborated using Git version control, maintaining clean branches, pull requests, and continuous deployment pipelines via Vercel.
- Applied responsive design and accessibility best practices, ensuring seamless UX across devices and browsers.

Highlighted Projects

PulseBoard – Interactive Dashboard App (React, Tailwind CSS, Chart.js) | 07/2025

- Designed a real-time analytics dashboard with interactive charts, responsive grid layouts, and modular stat cards.
- Improved render performance by 25% through optimized component rendering and state

management.
- Delivered 100% mobile responsiveness with Tailwind CSS grid and flex utilities.
Live Demo: https://pulseboard1.vercel.app/ | GitHub:
https://github.com/DanielBonami/pulseboard

Real Estate App (Next.js, Tailwind CSS, Framer Motion) | 04/2025

- Created a dynamic property listing platform with advanced search and filter logic, improving discoverability and UX.
- Integrated Framer Motion animations, boosting session duration and interaction rate by 35%.
- Optimized API calls and route prefetching, achieving 40% faster load times on initial render.
Live Demo: https://real-estate-ten-delta.vercel.app/ | GitHub:
https://github.com/DanielBonami/real-estate

Background Generator App (React, Tailwind CSS) | 04/2024 – 05/2024

- Engineered a real-time CSS gradient generator with randomizer, color pickers, and smooth transitions.
- Streamlined UX with instant feedback and zero-delay UI updates, enhancing engagement metrics.

https://github.com/DanielBonami/backgroundgenerator

Education

Zero To Mastery Academy – Complete Web Developer Program (Remote, 2024 – 2025)
- Completed project-based training in React, Next.js, TypeScript, and responsive design methodologies.

Guyer High School – Denton, TX
High School Diploma, 2022

Key Achievements

- deployed 3+ production-grade applications using modern JavaScript frameworks.
- Improved component scalability and reusability, reducing future build times by up to 30%.
- Achieved consistent Lighthouse performance and accessibility scores above 90.
- Designed, tested, and deployed apps.
